DETAILED ACTION

Applicant added new claims 29-44 after the filing of an RCE on 8/19/2005. These new claims necessitate the restriction below.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, 29-33 and 38-44 drawn to a harvesting apparatus, classified in class 56, subclass 328.1.
 - II. Claims 34-37, drawn to a method of harvesting cranberries from a cranberry field, classified in class 56, subclass 330.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the harvesting apparatus can be used to harvest crops other than cranberries in a cranberry field. For example, the device could also be used harvesting other types of fruit and even could be used to harvest grain.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Meredith C. Petravick whose telephone number is 571-272-6995. The examiner can normally be reached on M-T 8:00 a.m.- 5:00 p.m..
